Anything you need regarding ART we got it

An **art gallery** is a building or space for the exhibition of art, usually visual art. Museums can be public or private, but what distinguishes a museum is the ownership of a collection. Paintings are the most commonly displayed art objects; however, sculptures, decorative arts, furniture, textiles, costumes, drawings, pastels, watercolors, collages, prints, artist's books, photographs, and installation art are also regularly shown. Although primarily concerned with providing a space to show works of visual art, art galleries are sometimes used to host other artistic activities, such as performance arts, music concerts, or poetry readings

An **artist's portfolio** is an edited collection of their best artwork intended to showcase an artist's style or method of work. A portfolio is used by artists to show employers their versatility by showing different samples of current work. Typically, the work reflects an artist's best work or a depth in one specific area of work. Historically, portfolios were printed out and placed into a book. With the increased use of the internet and email, however, there are now websites that host online portfolios that are available to a wider audience. Sometimes an artist's portfolio can be referred to as a lookbook.
